

Section 1.

1. These regulations may be cited as the Minimum First-Aid Regulations.

Section 2.

2. In these regulations,

"St. John Standard Certificate" refers to the certificate awarded to a person who has received training and has current qualifications in standard first-aid as required by the Priory of Canada of the Most Venerable Order of the Hospital of St. John of Jerusalem (commonly known as St. John Ambulance Association) or an equivalent certification acceptable to the Director;

"St. John Advanced First-Aid Certificate" refers to the certificate awarded to a person who has received training and has current qualifications in advanced first-aid as required by the Priory of Canada of The Most Venerable Order of the Hospital of St. John of Jerusalem (commonly known as St. John Ambulance Association) or an equivalent certification acceptable to the Director, such as a British Columbia Industrial First Aid Certificate;

"SOFA" means a St. John Ambulance Safety Oriented First-Aid Certificate.

Section 3. GENERAL DUTIES OF EMPLOYERS

3. (1) All employers shall provide and maintain first-aid services, first-aid equipment, and first-aid supplies according to their hazard classification as shown in Tables 2 to 7, and in Table 13.
(2) The first-aid services and first-aid equipment specified by these regulations are the minimum which an employer is to provide unless specifically exempted in writing by a Chief Industrial Safety Officer or Chief Mines Safety Officer.
(3) Employers shall ensure that the first-aid supplies, first-aid services, and first-aid equipment required by these regulations shall be readily accessible and available to workers during all working hours.

Section 4. ENFORCEMENT AND VARIATION OF STANDARDS

4. A safety officer may issue an order requiring the employer or supervisor to make such changes, improvements, or additions as may be necessary to bring the standard of first-aid supplies, first-aid equipment and first-aid services up to that required by these regulations where there is
 - a) lack or inadequacy of first-aid supplies or first-aid services, or
 - b) improper maintenance of first-aid supplies or first-aid services.

Section 5.

5. (1) When due to the nature and location of the operation under the employer's direction or the distance from a hospital or equivalent facilities for medical care there is a need for greater first-aid service and first-aid equipment than that specified in these regulations, a Chief Mines Safety Officer or a Chief Industrial Safety Officer may order that standards higher than those indicated by Tables 2 to 7 and Table 13 be conformed to.
- (2) A Chief Industrial Safety Officer or Chief Mines Safety Officer may approve any variation in the first-aid services and first-aid equipment described in these regulations.

Section 6.

6. The employer shall, upon request, complete and return to a Chief Industrial Safety Officer or Chief Mines Safety Officer a report outlining the first-aid supplies, first-aid equipment and first-aid services available at each place of employment.

Section 7. MAINTENANCE OF WORK SITE AND RECORDS

7. (1) First-aid supplies and first-aid equipment shall be kept clean and dry at all times.
- (2) Supplementary first-aid services, as required by Table 1 in section 16, shall be provided to workers at any site more than 20 minutes surface travel time from the first-aid service at the main area of employment.
- (3) The employer shall ensure that signs are kept posted in conspicuous places in the working areas to show the location of first-aid supplies, equipment and services.

Section 8.

8. (1) The employer shall maintain at the work site a written record of all injuries, including
 - a) the name of the injured worker,
 - b) the date and time of injury,
 - c) the date and time of reporting,
 - d) a brief description of how the injury occurred,
 - e) the name of witnesses,
 - f) a brief description of the nature of the injury or injuries and the location thereof on the worker's body,
 - g) a description of the treatment rendered,
 - h) the patient's signature (when possible),
 - i) the first-aid attendant's signature.
- (2) The records referred to in subsection (1) shall be produced at the request of a safety officer.

Section 9.

9. The employer shall keep posted at all times in a conspicuous place at the place of employment a placard or placards titled "NOTICE TO WORKERS" stating the necessity of reporting promptly all injuries and of receiving first-aid treatment.

Section 10.

10. An adequate means of communication shall be provided and maintained between isolated places of employment and the base of operations or outside assistance.

Section 11. HAZARD REQUIREMENTS

11. (1) Where workers of more than one employer are carrying on their work activities at the same place of employment
- a) they shall all be included in determining the "number of workers per shift", and
 - b) the contractor, or where there is no contractor, the principals or person for whom the work is undertaken shall ensure that the first-aid services and equipment are provided and maintained.
- (2) The "number of workers per shift" in "A" and "B" hazard industries shall be determined by adding to the total number of workers in the higher hazard 25% of those workers whose duties are classed as "C" hazard.

Section 12.

12. (1) For an industry designated "A" in Table 13 the employer shall provide and maintain the first-aid services and first-aid equipment specified in Tables 2 and 3.
- (2) Where the place of employment is located more than one hour surface travel time from a hospital and workers are lodged at or near the place of employment "number of workers per shift" in Table 2 means the total number of workers at the place of employment whether on or off shift.

Section 13.

13. (1) For an industry designated "B" in Table 13 the employer shall provide and maintain first-aid equipment and first-aid services specified in this section and in Tables 4 and 5.
- (2) For an industry designated "C" in Table 13 the employer shall provide and maintain first-aid equipment and first-aid services, as specified in this section and in Tables 6 or

7.

Section 14. FIRST-AID ROOMS AND DRESSING STATIONS

14. (1) A first-aid room shall be
- a) located as near as practicable to the work area as it is to service,
 - b) situated in a place which will allow for optimum ease of access for stretcher patients,
 - c) adequately lit,
 - d) adequately heated and ventilated for patient care,
 - e) provided with a sink and hot and cold running water,
 - f) provided with storage cupboards and a counter,
 - g) provided with a non-porous floor covering,
 - h) kept clean and sanitary,
 - i) used only for first-aid or other health care,
 - j) provided with means to summon a first-aid attendant,
 - k) at least 9 m (100 square feet) if a #4 First-Aid Room and at least 18 m (194 square feet) if a #5 First-Aid Room as shown in Table 12, and
 - l) supplied with the equipment, instruments, and supplies listed in Table 10.
- (2) A dressing station shall be
- a) located as near as practicable to the work area it is to serve,
 - b) situated in a place which will allow for optimum ease of access for stretcher patients,
 - c) adequately lit,
 - d) adequately heated and ventilated for patient care,
 - e) kept clean and sanitary,
 - f) used in manner which will not impede the treatment of a patient,
 - g) supplied with a treatment chair, and
 - h) supplied with a #2 Unit Kit.

Section 15.

15. (1) A first-aid attendant shall not be required to do work that will
- a) interfere with the attendant seeing or hearing any visual or audible communication indicating that first-aid services are required,
 - b) impede the attendant from rendering prompt treatment of an injured worker,
 - c) prevent the attendant from effectively cleaning his or her hands with one quick wash of soap and water, and
 - d) prevent the attendant from treating an injured worker promptly in clothing free from gross dirt, oil or grease contamination.
- (2) There shall be an effective visual or auditory means for calling the first-aid attendant.

(3) The first-aid attendant shall be in charge of all first-aid treatment of injured workers until medical aid is available.

(4) Decisions of first-aid attendants relating to first-aid and the need for medical attention shall not be over-ruled by supervisory personnel.

(5) Every employer shall require the first-aid attendant to show a valid first-aid certificate to the person in charge of the operation at which the attendant is engaged before he or she commences his or her duties.

(6) The first-aid attendant shall retain proof of valid certification at the work site, and shall produce this certificate for inspection at the request of a safety officer.

(7) Copies of first-aid attendant's certificates are not acceptable as proof of certification unless they are certified as true copies by the issuer of the certificate.

Section 16. TRANSPORTATION

16. All conveyances used by or under control of the employer for the purpose of transporting workers to and from work sites shall be equipped with a first-aid kit as follows:

TABLE 1

Seating Capacity Including Driver	Size of Kit
1 - 3 workers	#01 Unit Kit
4 - 6 workers	#1 Unit Kit
7 or more workers	#2 Unit Kit

Section 17.

17. Every employer shall furnish to any worker injured in his employment immediate conveyance and transportation to a hospital or qualified medical practitioner for initial treatment, when necessary.

Section 18.

18. (1) An emergency transportation vehicle shall
a) be immediately available for use during working hours,
b) be in a location in which it will best serve the workers for whom it is provided,

- c) not be used for any purpose which may delay transportation of injured workers,
- d) be capable of traversing the terrain within the area it serves,
- e) where deemed necessary by a safety officer, have a means for effective communication with workers at a scene of an accident and with the hospital to which the injured worker is being transported,
- f) have provision for effective voice communication between the driver and the attendant,
- g) afford warmth sufficient to good patient care, and provide protection from the natural elements and dust,
- h) be capable of transporting at least one stretcher patient,
- i) contain a stretcher restraining or padding arrangement which will prevent excessive movement,
- j) contain a #2 Unit First Aid Kit, and
- k) contain oxygen therapy equipment as required in section 23.

Section 19.

- 19.(1) An industrial ambulance shall
- a) be under the care and control of an Advanced First-Aid Attendant or an attendant with equivalent qualifications,
 - b) be located where it will best serve the workers for whom it is provided,
 - c) not be driven by the first-aid attendant when the patient may require first-aid attention enroute,
 - d) be capable of traversing the terrain within the area it serves,
 - e) where deemed necessary by a safety officer, have a means of effective communications with workers at a scene of an accident and with the hospital to which the injured worker is being transported,
 - f) have provision for effective voice communication between the driver and the attendant,
 - g) afford warmth sufficient to good patient care, and provide protection from the natural elements and dust,
 - h) have adequate interior lighting,
 - i) have minimum headroom of 1000 mm (40 inches),
 - j) be capable of accommodating at least two stretcher patients,
 - k) contain a roll cot or basket stretcher properly secured, and cushioned against excessive jarring,
 - l) contain oxygen therapy equipment as required by section 23,
 - m) contain an emergency first-aid kit as specified in Table 11, and
 - n) contain a breathing bag and two soft plastic airways (one standard and one small).

Section 20.

- 20.(1) A mobile treatment centre shall be a vehicle which meets all of the specifications of

an industrial ambulance and which, in addition, shall have

- a) a sink and running water,
 - b) at least 1.8 m (six feet) of headroom in the treatment area, and
 - c) #3 first-aid equipment.
- (2) A mobile treatment centre may be used instead of the combined facilities of a #4 first-aid room or dressing station and an emergency transportation vehicle if
- a) the location of the work site is such that overnight accommodation for workers is not provided, and
 - b) the work site is located less than two hour's surface travel time to a hospital.

Section 21.

21. (1) Industrial ambulances and mobile treatment centres shall be used only for first-aid treatment and transportation of injured workers.
- (2) A first-aid attendant shall, if he or she deems it necessary, accompany an injured worker being transported by industrial ambulance or mobile treatment centre.

Section 22.

22. (1) In areas where access by conventional land conveyance and transportation is not possible or the conditions of the road or terrain are detrimental to the welfare of the injured worker an alternate means of conveyance and transportation of the injured worker shall be arranged for by the employer.
- (2) Where air transportation is utilized, stretchers suitable for use in an aircraft or helicopter shall be provided.

Section 23. OXYGEN THERAPY EQUIPMENT AND OPERATION

23. (1) Approved oxygen therapy equipment consists of
- a) a control assembly (regulator) with approved pin-indexed yoke,
 - b) two oxygen bottles ("D" or "E" type),
 - c) two disposable plastic masks,
 - d) two airways (adult and small sizes),
 - e) suitable wrenches for the medical post, and
 - f) a carrying case or pack board.
- (2) Oxygen therapy equipment shall be of a constant flow inhalator type and oxygen shall be delivered through a yoke attachment, pin-indexed for oxygen, to a flow control valve operating accurately with the tank in any position.
- (3) Supply tubes of smooth vinyl or equivalent to the mask shall be not more than 3 mm (1/10 inch) inside diameter; face masks shall be translucent and closely fit the face with

unobstructed outlets allowing free movement of atmospheric air.

(4) Cylinders shall be medical "D" or "E" size equipped with standard post valves; the oxygen shall be metered through a gauge reading in litres per minute.

(5) The control assembly shall incorporate a static pressure gauge on the high pressure side, and a rupture disc to relieve excessive pressures.

Section 24.

24. (1) A cylinder valve wrench shall be secured to the yoke of each assembly; large commercial oxygen tanks shall be used in place of "D" or "E" size tanks when the surface travel time makes a prolonged 10 litre (2.2 gal.) per minute flow impractical.

(2) A plainly visible "NO SMOKING" sign shall be attached to oxygen therapy equipment.

(3) Cylinders shall be hydrostatically tested at least every five years and a test date stamped on the cylinder close to the neck.

(4) Only qualified personnel shall transfill and refill oxygen cylinders.

Section 25. MUNICIPAL FIRE FIGHTERS

25. (1) When a municipal corporation employs 10 or more full-time fire-fighters at least one out of every 10 shall be the holder of a St. John Advanced First-Aid Certificate.

(2) When ten or more full-time or volunteer fire-fighters are dispatched to a fire at least one shall be a qualified St. John Advanced First-Aid attendant.

Section 26.

26. (1) The following equipment shall be available to fire-fighters:

- a) a #2 Unit First-Aid Kit;
- b) oxygen therapy equipment;
- c) bag and mask and airways; and
- d) two sterile burn sheets in sealed plastic containers.

Section 27.

27. (1) Every fire-fighter shall hold certificates in:

- a) Cardiac Pulmonary Resuscitation to a standard acceptable to an approved qualified Cardiac Pulmonary Resuscitation Instructor; and
- b) St. John Standard First-Aid.

Section 28. CAMPS

28. (1) No person may operate a camp unless provisions satisfactory to the Director for first-aid, nursing, and sick quarters in association with adequate communication and transportation facilities are provided and maintained.

(2) No person may operate a camp normally occupied by 26 to 50 occupants unless first-aid supplies and sick quarters are maintained separately from the general living quarters or living area.

(3) No person may operate a camp normally occupied by more than 50 occupants unless

- (a) subsections (1) and (2) are complied with, and
- (b) there is a subsisting contractual arrangement with a qualified medical practitioner for the medical care of the occupants and the supervision of health control and sanitation at the camp.

(4) A medical practitioner may not, without the approval of the Director, contract for the medical care of more than 1,000 occupants of a camp at any one time unless he employs a medically qualified assistant to assist him.

TABLE 8 UNIT PACKAGES

Unit packets, when required, shall be sealed and clearly marked as to contents and shall consist of:

- PACKET A - Containing four Hand Cleansers and twelve Gauze Cleaning Pads.
- PACKET B - Containing one 2-ounce unbreakable container of antiseptic, in fluid or powder form of twenty Antiseptic Swabs.
- PACKET C - Containing twenty-five 1" x 3" Adhesive Dressings, individually wrapped.
- PACKET D - Containing four 2" Compress Dressings.
- PACKET E - Containing one 4" Compress Dressing.
- PACKET F - Containing two Gauze Pads and two Eye Shields or equivalent cover.
- PACKET G - Containing one 2 ounce or two 1 ounce tubes of Water Soluble Burn Treatment.
- PACKET H - Containing one 4-ply Gauze Dressing, minimum size 17" x 17" square.
- PACKET I - Containing two 2" x 6 yards Gauze Bandage and one 1" x 5 yards Adhesive Tape.
- PACKET J - Containing one Triangular Bandage.
